Topic 14: Switch Node & Workflow Routing — Test Results Document

1. Test Objective

Verify that the n8n Switch node correctly routes multiple user profiles based on their role values and handles unmatched values through the fallback branch.

2. Test Environment

- Platform: n8n
- Trigger: Manual Trigger
- Input: Four sample user profiles
- Routing: Switch node in Rules mode
- Downstream actions: Four Edit Fields nodes

3. Test Cases and Results

Test Case ID	Test Description	Expected Result	Actual Result	Status
TC-1401	Switch node integration	Switch node configured	Configured successfully	PASS
TC-1402	Admin routing	Alex reaches Output 0	Correct output	PASS
TC-1403	Editor routing	Sarah reaches Output 1	Correct output	PASS
TC-1404	Viewer routing	John reaches Output 2	Correct output	PASS
TC-1405	Guest fallback	David reaches Fallback	Correct output	PASS
TC-1406	Multiple item processing	Four profiles processed	Four items received	PASS
TC-1407	Admin downstream action	isAdmin = true	Correct Boolean value	PASS
TC-1408	Editor downstream action	isEditor = true	Correct Boolean value	PASS
TC-1409	Viewer downstream action	isViewer = true	Correct Boolean value	PASS
TC-1410	Guest downstream action	isGuest = true	Correct Boolean value	PASS
TC-1411	Dynamic expression	Role read using expression	Expression configured	PASS

TC-1412	Multiple output routing	Four distinct outputs	Four outputs verified	PASS

4. Input Test Data

```
None
[
  {"name": "Alex", "role": "admin"},
  {"name": "Sarah", "role": "editor"},
  {"name": "John", "role": "viewer"},
  {"name": "David", "role": "guest"}
]
```

5. Downstream Execution Results

Admin Output

```
None
[
  {
    "isAdmin": true
  }
]
```

Status: PASS

Editor Output

```
None
[
  {
    "isEditor": true
  }
]
```

Status: PASS

Viewer Output

```
None
[
  {
    "isViewer": true
  }
]
```

Status: PASS

Guest Output

```
None
[
  {
    "isGuest": true
  }
]
```

Status: PASS

6. Functional Requirements Verification

Requirement	Result
REQ-001	PASS
REQ-002	PASS
REQ-003	PASS
REQ-004	PASS — configured rule order verified
REQ-005	PASS
REQ-006	PASS
REQ-007	PASS

7. Technical Requirements Verification

Requirement	Result
TR-001	PASS — sample output indexes verified
TR-002	PASS — four separate items routed into output groups

8. Final Conclusion

The Topic 14 Switch Node & Workflow Routing exercise was successfully implemented and tested.

All four profiles were routed to their correct output branches. The fallback output successfully handled the unmatched guest role. All four downstream Edit Fields nodes returned their expected Boolean values.

Overall Test Result: PASS

9. Evidence Checklist

Attach the following screenshots for trainer verification:

- Complete n8n workflow canvas.
- Input User Profiles node configuration.
- Split Out node output showing four items.
- Switch node showing all four output branches.
- Admin downstream execution output.
- Editor downstream execution output.
- Viewer downstream execution output.
- Guest downstream execution output.

Testing Note: A separate overlapping-rule precedence test was not performed. The configured equality rules were verified using distinct role values.
